

Conservatives ruined the country
Labour and the Lib Dems are
trying to destroy it

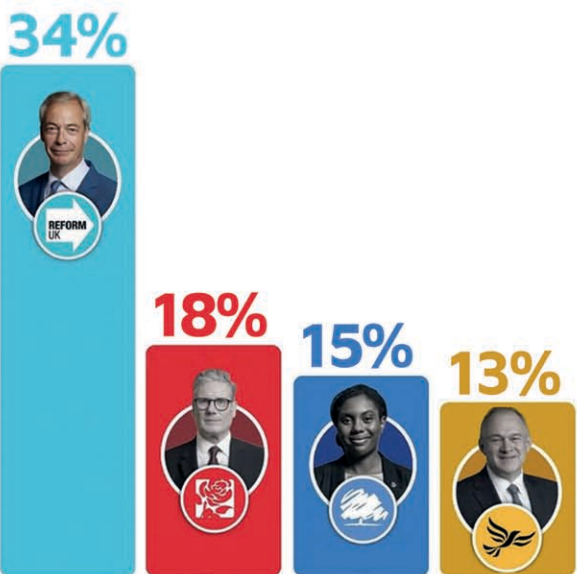

REFORM UK - A NEW HOPE

- 1. No More Small Boats**
Illegal migrants who come to the UK will be detained and deported. And if needed, migrants in small boats will be picked up and taken back to France.
- 2. Imagine No NHS Waiting Lists**
Still free at the point of delivery, healthcare needs reform to improve outcomes and enjoy zero NHS waiting lists. Cut back office waste to spend more money on the frontline. Tax breaks for doctors and nurses to tackle the staffing crisis.
- 3. Good Wages for a Hard Day's Work**
Lift the income tax starting threshold to £20k to save the lowest paid £1,500 per year. This takes 7 million of the least well-off out of Income Tax to make work pay and get people off benefits.
- 4. Affordable, Stable Energy Bills**
Scrap energy levies and Net Zero to slash energy bills and save each household £500 per year. Unlock Britain's vast oil and gas reserves to beat the cost of living crisis and unleash real economic growth.

NEWS

- Let's have a proper debate
- Battling the budget
- Reviving small business
- Mass uncontrolled immigration continues
- Lib Dems local asset stripping

Let's Have a Proper Debate

Other parties' policies are failing and because they cannot debate policy effectively, they insult and stereotype Reform supporters. Our policies will work because they are fair and simple. Reform believes that the country faces a tipping point from which, unless we take action, there will be no return.

- The NHS should provide free medical care to British people only
- The welfare state should protect British people in genuine need
- State education should teach students according to their needs & ability
- Non UK citizens should be law abiding, self-supporting and adjust to our ways, rather than expecting us to adjust to theirs

The Conservative Party has collapsed! LibDem leaders are worrying about potholes and drains but they have lost sight of the big picture. They want more immigration, more tax and spending and more 'green' restrictions. The Greens have elected a communist as leader who wants to tax you until you own nothing and your freedom is replaced by a life under licence.

Battling the Budget

Until elected we cannot know for sure the extent of the financial challenges that face us in East Surrey. But everyone knows public sector waste is endemic, contracts are too cosy and there is complacency with public money. Reform aims to end all this in a radical not a revolutionary way. Hence we are appealing to people who work in the Public Sector to help us begin the process. Our guiding principles will be to:

- Oppose all new spending until we are sure we can afford it
- Stop hiring / contracting new staff for 5 years allowing natural wastage to reduce the head count
- Expose and eliminate the waste at every level
- Reject the notion that everyone who arrives on our shores is a genuine asylum seeker; oppose housing illegal immigrants; put East Surrey residents and businesses first

Reviving Small Business,
Reform Action v Lib Dem Taxation

Our just released small business plan (launched November 2025) makes Reform the SME's true champion - crucial for Surrey's high streets, home offices and businesses. With 99% of UK firms being small, employing 60% of the private workforce, the plan slashes red tape strangling growth. We will also raise the VAT threshold to encourage expansion and scrap IR35 for freelancers. We will also look to reverse the quarterly HMRC filings that have attracted so much condemnation from SMEs.

Reform are also setting up a Small Business Council for SMEs to join to give us your policies ideas leading up to the next general election.

The Lib Dems by contrast want to impose a business Land Value Tax in place of the rates. But this will surely hit Surrey businesses hard leading to more give-aways elsewhere in the country. Surrey business owners please take note: The Lib Dems are not your friends so join our Small Business Council when it launches and have your say.

OUR PRIORITIES

Safety

- Stop housing illegal migrants
- Tough action on crime & anti-social behaviour
- Protect residents from intimidation & disorder

Community

- Put local residents first in provision of services
- Back local businesses and jobs
- Protect the character of East Surrey

Efficiency

- Cut council waste & vanity projects
- Full transparency on public spending
- Better basic services

Migrant Housing & Reform Plans

East Surrey residents are concerned about housing illegal immigrants in their towns. There is an increase in violent crimes and sexual assaults connected to migrant hotel residents across the nation. In Horley a 26 year old migrant housed in a local asylum hotel, was found guilty of sexually assaulting three women over a three week period, May-June 2025. The assaults occurred along a bike path in Horley. He was convicted on all three counts. The sexual assaults, violence, and theft among some housed migrants needs to end.

What will Reform UK do to reduce the violence, social and financial cost of illegal immigration? A Reform government will:

- Leave the ECHR
- Repeal the Human Rights Act and replace it with a British Bill of Rights
- Pass The Illegal Migration (Mass Deportation) Bill
- Everyone deported will be banned from re-entering for life

The Bill opens with a blunt obligation for the Home Secretary: "The Secretary of State shall ensure the removal from the United Kingdom of each person who does not have extant leave to remain and is not an Irish citizen or otherwise protected by regulations under this act". Things are very serious but Reform are very serious too.

Lib Dems Local Asset Stripping

Liberal Democrats are promising they will "protect" community assets. But their record in Surrey shows the opposite.

In Surrey Heath, the Liberal Democrat council, facing a budget shortfall of more than £3 million, are selling off land and community assets (including plots earmarked for housing) simply to balance the books. Local democracy reporters and BBC Surrey confirm that these disposals are being used as a financial stopgap.

Once these assets are sold, they are gone forever. That is not "protection" - it's short-term fire-fighting at residents' expense. Selling assets to cover current expenditure should not be allowed. Selling off the family silver is never a good idea.

Reform UK offers a better way forward. We will:

- Protect libraries, community centres, and green spaces.
- End forced sell-offs by running councils with sound financial management.
- Invest in community facilities so they serve future generations.

The best way to safeguard public assets is not with empty promises, but with Reform UK councillors who will put residents first.
